Checklist and Common Names of South Australian Reptiles and Frogs

Based on the Australian Society of Herpetologists (ASH) Official Species List, 30 June, 2022*

Conservation Status codes:

C	Common in suitable habitat, Least Concern
NE	Endangered (National rating) – threatened with extinction nationally unless action taken
NV	Vulnerable (National rating) – likely to become endangered nationally if existing trends continue
SE	Endangered (in SA) – threatened with extinction in SA unless action taken
SR	Rare (in SA) – seldom seen, or very limited distribution; data deficient
SV	Vulnerable (in SA) – likely to become endangered in SA if existing trends continue
U	Uncommon or localised, Least Concern
(v)	Vagrant; tropical marine species occasionally recorded along SA coast
(i)	Introduced.

*The ASH Official List of Australian Species includes recommended common names. These names have largely been adopted in the identification keys and may be different to some names with which you are more familiar.
