

Checklist and Common Names of South Australian Reptiles and Frogs

Based on the Australian Society of Herpetologists (ASH) Official Species List, 30 June, 2022*

Conservation Status and relative abundance codes:

Nationally rated

- NE Endangered – threatened with extinction nationally unless action taken
 NV Vulnerable – likely to become endangered nationally if existing trends continue

State rated

- SE Endangered – threatened with extinction in SA unless action taken
 SR Rare – seldom seen, or very limited distribution; data deficient
 SV Vulnerable – likely to become endangered in SA if existing trends continue

Least Concern

- C Common in suitable habitat
 U Uncommon or localised
 (v) Vagrant; tropical marine species occasionally recorded along SA coast
 (i) Introduced.

*The ASH Official List of Australian Species includes recommended common names. These names have largely been adopted in the identification keys and may be different to some names with which you are more familiar.
