

**South Australian Museum
School holiday program**

Sustainability Saturday

Saturday 21 July, 10am-4pm

Join us on the front lawns of the Museum for activities all about sustainability and the carbon cycle.

The nature playground

Drop-in, 10am-4pm

The Climbing Tree will be setting up a nature playground to get kids interested in rainy, outdoor play. Make noise with musical instruments made from reclaimed objects, build a shelter from branches and leaves, or learn new games to play with twigs and rocks!

Our carbon footprint

Drop-in, sessions every hour

How big would your dream house be? How much TV would you watch every day if you could? Museum educators will lead kids in a fun activity to teach them about their carbon footprint. Learn about the carbon-intensive activities in your life and compare different choices.

A little greenhouse

Drop-in, sessions every hour

Kids will create their own greenhouses in jars with the help of Museum educators. We'll learn about the carbon cycle and how greenhouse gases work.

Starting a garden

Drop-in, 10am-4pm

We'll reuse household objects such as cups and cardboard rolls to plant seedlings. Kids can take them home and start their own gardens.
